# TRANS-ENERGY INTERVIEW QUESTIONS

## 1.INTRODUCTION

**Answer:**
Good morning sir/madam. My name is Ketha Mahalakshmi. I am currently pursuing my 4th year B.Tech in Electronics and Communication Engineering at KL University, and my current CGPA is 8.5. I am very interested in starting my career in a good organization where I can learn practical skills and improve my technical knowledge. I am a quick learner, hardworking, and disciplined person. I can adapt to new environments easily and I am always ready to learn new things. I am looking for an opportunity where I can prove myself and grow professionally.

**2. Why do you want to join TransEnergy?**

**Answer:**
I want to join TransEnergy because it is a good opportunity for freshers to start their career in industry. This role will help me gain practical knowledge in manufacturing, quality inspection, and machine maintenance. I want to learn, work hard, and grow with the company.

**3. Why should we hire you?**

**Answer:**
You should hire me because I am a fresher with a strong learning attitude, discipline, and willingness to work hard. I can adapt quickly, follow instructions, maintain quality in work, and work well in a team.

**4. What do you know about this role?**

**Answer:**
This role is related to manufacturing, quality inspection, and machine maintenance. The work includes machining and assembling brake components, checking product quality, identifying defects, maintaining machines, and following safety procedures.

**5. Are you comfortable working in a manufacturing environment?**

**Answer:**
Yes sir/madam, I am comfortable working in a manufacturing environment. I am ready to learn the process and work with discipline.

**6. Are you willing to work in shifts?**

**Answer:**
Yes, I am willing to work in shifts.

**7. Are you willing to relocate to Chennai locations?**

**Answer:**
Yes, I am willing to work in the given locations.

**8. What are your strengths?**

**Answer:**
My strengths are quick learning, patience, discipline, attention to detail, and teamwork.

**9. What is your weakness?**

**Answer:**
Sometimes I focus more on accuracy, which may take a little extra time, but I am improving my speed with practice.

**10. Why did you choose manufacturing after ECE?**

**Answer:**
I chose this opportunity because I want to start my career in a core industrial environment. My engineering background helps me understand technical concepts, and I am interested in gaining practical experience in production, quality, and maintenance.

# CORE RELATED QUESTIONS

**11. What is quality?**

**Answer:**
Quality means a product meeting the required standards and specifications without defects.

**12. What is quality inspection?**

**Answer:**
Quality inspection is the process of checking whether the product is manufactured correctly according to the required standards and specifications.

**13. What is a defect?**

**Answer:**
A defect is any damage, error, or mismatch in a product that does not meet the required standards.

**14. What is tolerance?**

**Answer:**
Tolerance is the allowed variation in a dimension from the specified value.

**15. What is the difference between Quality Control and Quality Assurance?**

**Answer:**
Quality Control is checking the product for defects. Quality Assurance is improving the process to prevent defects.

**16. What is visual inspection?**

**Answer:**
Visual inspection means checking a component with the eyes for cracks, scratches, dents, or any visible defects.

**17. What is mechanical inspection?**

**Answer:**
Mechanical inspection means checking dimensions, fitting, movement, or condition of a component using tools or standard methods.

**18. What is manufacturing?**

**Answer:**
Manufacturing is the process of converting raw materials into finished products using machines, tools, and manpower.

**19. What is assembly?**

**Answer:**
Assembly is the process of joining different parts together to make a complete product.

**20. What is machine maintenance?**

**Answer:**
Machine maintenance is the process of checking, cleaning, servicing, and repairing machines to ensure proper operation.

**21. What is preventive maintenance?**

**Answer:**
Preventive maintenance means regularly checking and servicing machines before a problem occurs to avoid breakdowns.

**22. What is breakdown maintenance?**

**Answer:**
Breakdown maintenance means repairing a machine after it stops working.

**23. What is 5S?**

**Answer:**
5S is a workplace organization method used for cleanliness, safety, and efficiency. The 5S are Sort, Set in Order, Shine, Standardize, and Sustain.

**24. Why is safety important in production?**

**Answer:**
Safety is important to prevent accidents, protect workers, avoid machine damage, and ensure smooth production.

**25. What will you do if you find a defective part?**

**Answer:**
I will stop it from going to the next stage, inform the supervisor or quality team, and follow the proper procedure.

**26. What will you do if a machine is not working properly?**

**Answer:**
I will inform the supervisor or maintenance team immediately and follow safety procedures instead of handling it carelessly.

**27. Can you work in a team?**

**Answer:**
Yes, I can work well in a team. I understand that teamwork and communication are very important in production work.

**28. How do you handle pressure?**

**Answer:**
I stay calm, focus on the work, follow instructions properly, and complete tasks step by step.

**29. What are your career goals?**

**Answer:**
My short-term goal is to start my career in a good company, learn practical skills, and improve my technical knowledge. My long-term goal is to grow into a responsible position in production, quality, or maintenance.

**30. Do you have any questions for us?**

**Answer:**
Yes sir/madam. I would like to know what type of training will be provided for freshers in this role.

**31. What is an engineering drawing?**

**Answer:**
An engineering drawing is a technical drawing that shows the shape, size, dimensions, and specifications of a component.

**32. Can you read engineering drawings?**

**Answer:**
I have basic knowledge of reading engineering drawings, such as dimensions and part views, and I am ready to improve further through practical learning.

**33. Why is inspection important for brake components?**

**Answer:**
Brake components are safety-related parts, so proper inspection is very important to ensure performance and safety.

**34. What do you mean by product standards?**

**Answer:**
Product standards are the required rules, dimensions, and quality conditions that a product must meet.

**35. What is your biggest achievement?**

**Answer:**
My biggest achievement is completing my engineering successfully and improving my knowledge and confidence to start my professional career.

**36. Are you a quick learner?**

**Answer:**
Yes, I am a quick learner and I am always ready to learn new things.

**37. Can you work independently?**

**Answer:**
Yes, I can work independently, and I can also work effectively in a team when needed.

**38. Why do you want to start with this company?**

**Answer:**
I want to start with this company because it offers a good platform for freshers to learn industrial work practically and build a strong career foundation.

**39. What motivates you?**

**Answer:**
Learning new things, improving my skills, and growing in my career motivate me.

**40. If selected, how will you work?**

**Answer:**
If selected, I will work sincerely, follow company rules, maintain discipline, learn quickly, and give my best to the company.

**41. What is the meaning of discipline in the workplace?**

**Answer:**
Discipline in the workplace means coming on time, following rules, respecting supervisors, maintaining proper behavior, and completing work responsibly.

**42. Why should quality be maintained in production?**

**Answer:**
Quality should be maintained in production to reduce defects, satisfy customers, improve safety, and avoid losses.

**43. What is the role of a quality inspector?**

**Answer:**
The role of a quality inspector is to check products, identify defects, ensure standards are followed, and maintain product quality.

**44. What do you understand by teamwork?**

**Answer:**
Teamwork means working together with others, supporting each other, and coordinating properly to achieve the production target.

**45. Are you ready to learn new machines and processes?**

**Answer:**
Yes, I am ready to learn new machines, processes, and work methods.

**46. What is the role of maintenance in production?**

**Answer:**
Maintenance helps keep machines in good condition, avoid breakdowns, and ensure continuous production.

**47. How will you respond if your supervisor corrects your mistake?**

**Answer:**
I will take it positively, learn from the mistake, and make sure not to repeat it again.

**48. Are you okay with repetitive work?**

**Answer:**
Yes, I understand that production work may be repetitive, and I am ready to do it with focus and consistency.

**49. What is your expectation from this job?**

**Answer:**
My expectation is to learn practical industrial skills, gain experience, and grow professionally.

**50. Why are you suitable for this role?**

**Answer:**
I am suitable for this role because I am disciplined, willing to learn, comfortable working in industrial environments, and ready to work hard with sincerity.
